Sequence 35, Application US/08805918

Patent No. 5885821

GENERAL INFORMATION:
APPLICANT: MAGOTA, Koji
APPLICANT: MAGOTA, Toyofumi
APPLICANT: SUZUKI, Yuji
APPLICANT: ABOTA, BROCESS FOR PRODUCTION OF SECR
TITLE OF INVENTION: DERIVATIVES
NUMBERS OF SEQUENCES: 45
CORRESPONDENCE ADDRESS:
ADDRESSEB: BURNS, DOANE, SWECKER & MATHIS
STREET: P.O. BOX 1404
CITY: Alexandria
STATE: Virginia
COUNTRY: United States
ZIP: 22313-1404
COMPUTER: IEMP PC COMPATION
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PATENTIN Release #1.0, Version #1.30
CURSSIFICATION NUMBER: US/08/805,918
FILING BATE: 04 MAR-1997
CLAASSIFICATION 1415

RRIOR APPLICATION DATA:
APPLICATION NUMBER: JP 8-073217
FILING DATE: 04-WAR-1996
FILING DATE: 04-WAR-1996
FILING DATE: 10-10-1996
FILING DATE: 1-10-10-1996
FILING DATE: 1-10-10-1996
FILING DATE: 1-10-10-1996
ATTORNEY/AGENT INFORMATION:
NAME: Medls.TATION NUMBER: 36,607
REGISTRATION NUMBER: 36,607
REFERENCE/DOCKET NUMBER: 001560-295
TELEPHONE: (703) 816-620
TELEPHONE: (703) 816-2021
INFORMATION FOR SEQ ID NO: 34:
SEQUENCE CHARACTERISTICS:
LENGTH: 18 base pairs
TYPE: nucleic acid
STRANDEDNESS: single
TOPOLOGY: linear
MOLECULE TYPE: other nucleic acid
STRANDEDNESS: single
TOPOLOGY: linear

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   US-08-998-099-50

Sequence 50, Application US/08998099A

Sequence 50, Application US/0898099A

Patent No. 6103890

GENERAL INFORMATION:

APPLICANT: URAVIS, THALE

APPLICANT: MCSMIGGEN, JAMER A.

APPLICANT: STINCHCOMB, DAN T.

TITLE OF INVENTION: ENZYMATIC NUCLEIC ACID TREATMENT OF DISEASES

TITLE OF INVENTION: OR CONDITIONS RELATED TO LEVELS OF C-FOS

FILE REFERENCE: 231/175

CURRENT APPLICATION NUMBER: US/08/998, 099A

CURRENT APPLICATION NUMBER: US/08/998, 099A

EARLIER APPLICATION NUMBER: 08/37,658

EARLIER PILING DATE: 1997-01-23

EARLIER PILING DATE: 1995-01-13

EARLIER FILING DATE: 1995-01-13

EARLIER FILING DATE: 1994-05-18

SEALIER PILING DATE: 1994-05-18

SEQ ID NO 50

LENGTH: 17

TUMBER: FastSEQ for Windows Version 3.0

Sequence 4786, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Plarmaceuticals, Inc.

APPLICANT: McSw43gen, Jim

APPLICANT: McSw43gen, Jim

APPLICANT: Stinchcomb, Dan

APPLICANT: Stinchcomb, Dan

APPLICANT: Stinchcomb, Dan

APPLICANT: Stinchcomb, Dan

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Rel

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Rel

TITLE OF INVENTION: McHod and Reagent for the Treatment of Diseases or Conditions Rel

TITLE OF INVENTION: McHod and Reagent for the Treatment of Diseases or Conditions Rel

TITLE OF INVENTION: McHod and Reagent for the Treatment of Diseases or Conditions Rel

TITLE OF INVENTION: McHod and Reagent for the Treatment of Diseases or Conditions Rel

TITLE OF INVENTION UNMERR: US 60/005,974

PRIOR APPLICATION NUMBER: US 60/005,974

PRIOR PILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SEQTHARE: PatentIn version 3.0
